

Assignment 12

Create unit tests to verify the following using the data from project 2:

1. A sales report for March 16th and March 17th. They should include a list of items and quantities sold on each day as well names of the members who shopped that day. Report the total revenue for each day. It should also include number of Executive members and Regular members who shopped during these days.
2. A report that prints the total purchases for all members sorted by membership number. It should also include a grand total of the purchases.
3. A report that prints out the quantity of each item sold sorted by item name and the total revenue for each item.

Due April 15th
